Subject: Background Data Set

Jim – last Friday I had asked for the background data set since the file on the FTP site did not contain total PAHs; it only contained 4 individual PAHs and cPAHs. Since the RI is using Total PAHs as the indicator contaminant, then we need a background calculation of that one. Also, the text indicates that ½ ND was used in the summing for contaminants such as PAHs and PCBs, yet the TCDD TEQ titles have ND=0. We need to confirm which methodology was used in calculating sums. Could you please let me know when you can get us a response on this since it is delaying our review of Section 7.

Regards,

Kristine Koch
